Someone should contact Jeff Grant, New TBP Initiate, about how we might use the AIAA blimp when we have our Saturday luncheon in the Atrium. It has a trap door that could be used to deliver prizes, tickets, messages challenging someone to something, etc.

Dr. Fowler

This is some cool news! I think that Jeff would also be willing to operate the blimp since he is a tbp member and all...

Elizabeth,

I'm glad you asked. As a matter of fact our blimp has one really neat trick that we installed into it. and that is a trap door. The only problem is that the space that we can put stuff is limited to about 3X3 inches. Also we cant put anything really heavy in there because then when we drop it the blimp obviously would go up..up..up.... Also for next year we are planning on selling advertizement space for the college of Engineering or SGA, or Tau Beta Pi, etc. We would be able to drop maybe small tickets of some sort onto the people when they are at dinner in durland. that is a possibility. So We are really excited about using the blimp to help all organizations within the college to gain recognition. If you would like to set up a meeting with our officer's let me know. We will look forward to hearing back from you.

Sincerely,

The new and not so
improved region 4 head...
Jeff
